

You are going to measure the boat Antelope I using pigeon steps.

Line yourself up with one end of the boat and count how many steps you take to get to the other end.

Write your answer in the space below

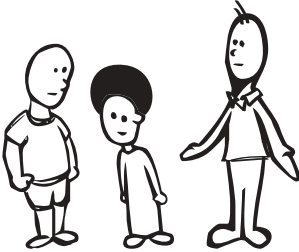

Each foot length  
= 1 pigeon step

**Antelope I**

Antelope I is ..... pigeon steps long

Now ask two of your friends how many steps they took. Ask one friend who is taller than you and one friend who is smaller than you and write the answers below.

The taller friend took ..... pigeon steps.

The smaller friend took ..... pigeon steps.

Is there a difference in the answers?      Yes       No

Why do you think this might be?

.....

.....

.....
